

Using Specialized Types and Language Features in TypeScript

GETTING STARTED

Hendrik Swanepoel

SOFTWARE ENGINEER

@hendrikswan

Overview

Concepts Covered in This Course

A brief overview of the concepts covered in this course

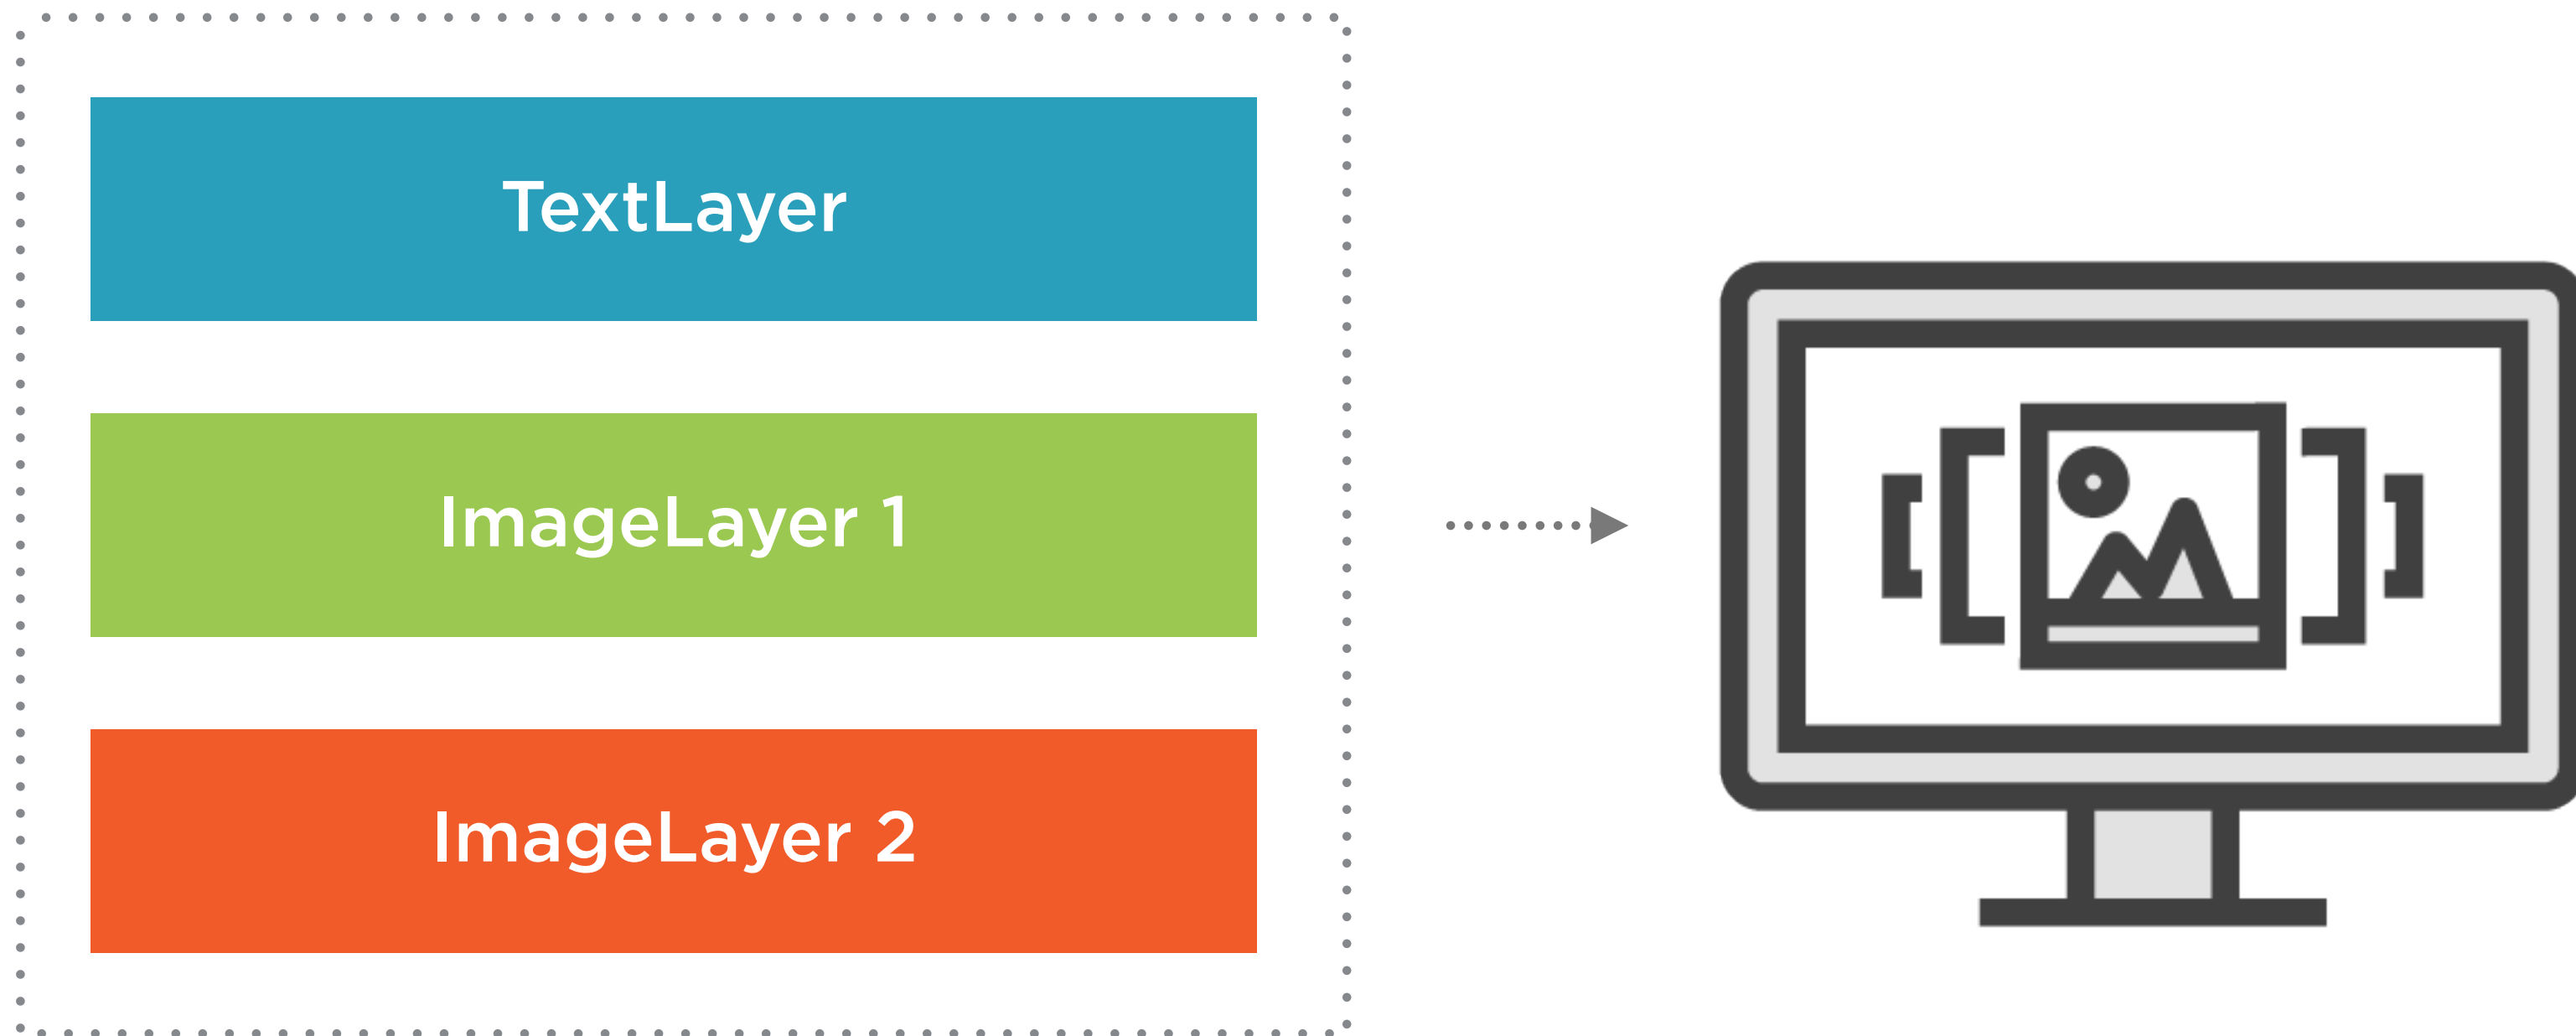

Your Environment

How to set up your environment to follow along with the code samples

The Domain for This Course

The Domain for This Course

What You'll Learn

Differentiating between types

Conditional types

Generating new types from
existing types

Extending objects with
symbols

What You'll Learn

Working with Tuples

Breaking classes down with
Mixins

Separating structure from
looping with iterators

Dealing with sequences that
change over time with
generators

Demo

Cloning the course repository

Installing dependencies

Running the code
